To whom it may concern

- 1 As part of Chapman Tripp's sustainable business project, Footprint, we engaged Waste Not Consulting to conduct waste audits before and after implementation of our new recycling systems. With Sunshine's audit and expertise we were able to accurately measure our waste baselines, and then nine months later, our improvements. Being able to independently verify and share our successes with our staff was invaluable to the project.
- 2 Sunshine was a wealth of knowledge and provided great support for the waste reduction and recycling initiatives we implemented. Not only were her audit reports comprehensive, with useful recommendations, she assisted in training our Sustainability Champions, and was always happy to help out with follow up questions and general guidance.
- 3 If your company is considering implementing waste management and recycling initiatives, I highly recommend Sunshine and Waste Not.

Yours faithfully

Alicia Crow
